

Prostate Cancer Support Group with Guest Speaker

Understanding Prostate Cancer Treatment Options

Prostate Cancer is complex. Patients often struggle to find accurate, stage-specific information amidst a deluge of data overload. The “Paradox of Choice” can be diminished by staging cancer accurately and properly evaluating where and what kind of prostate cancer you are dealing with.

In this session, **Mark Scholz, MD**, will guide you through the 15 stages of prostate cancer, recent updates and all possible treatment options. Learn how to avoid prostate cancer pitfalls and take control of your diagnosis. Those who are impacted by cancer, caregivers and healthcare professionals are all welcome to attend.

Offered in-person (Watch Party) and online (Zoom). Kindly RSVP so we can plan for attendance.

DATE:

WEDNESDAY, JULY 23
