

Educational Workshop

Empowering Patients with Breast Cancer:

ADVANCES IN BREAST CANCER CARE, RADIATION THERAPY ESSENTIALS, AND SIDE EFFECT MANAGEMENT

This online workshop will provide an overview on breast cancer care, focusing on recent advances in treatment. Participants will gain a clear understanding of the basics of radiation therapy and learn practical strategies for managing side effects, with an emphasis on improving quality of life and supporting overall well-being. Designed for patients, families, and caregivers, the workshop combines expert knowledge with practical guidance to promote confidence and informed decision-making throughout the treatment journey.

April Vasantachart, M.D. ~Assistant Clinical Professor, Radiation Oncology at City of Hope

Radiation oncologist April Vasantachart, M.D., knows that it is a privilege to support and guide patients through their cancer journey. As a physician, Dr. Vasantachart believes that her relationship with her patients requires a special connection that involves listening and learning on both ends to produce an individualized plan that meets the unique needs of each patient. A Southern California native, she was drawn to City of Hope because of its reputation for high-quality, innovative cancer care focused on treating the whole person.
