

In-Person Workshop (Zoom also available)

Cancer Pain Management & Living Meaningfully

Oncology pain medicine provides effective relief for 90% of cancer patients using tailored and multidisciplinary approaches, including pharmacological, interventional, and integrative therapies. In this workshop, we will discuss the various causes of pain in cancer patients and how patients can work with their healthcare team to best manage their symptoms and improve their quality of life.

Light refreshments will be provided.

Sandra H. Sacks, MD, MEd ~ *Pain Management Medicine at UCLA Health*

Dr. Sandra Sacks is a board-certified pain management physician who specializes in cancer pain. She works closely with the Oncology services in Santa Monica and Encino, with a special focus in multimodal medical management and minimally-invasive interventions to address the complex nature of cancer pain. She is triple board-certified in Anesthesiology, Palliative Medicine, and Pain Medicine. She is committed to providing high-quality, personal care to patients and their families. Her goal is to treat the whole person and advocates for an interdisciplinary team approach to minimize symptom burden and improve the quality of lives of cancer patients.
